

Information on empty properties

The below tables show information on the number of properties that have become empty over the past year and the last three years. This is split into property type, number of bedrooms and area.

This shows the turnaround of our housing stock, and gives a realistic idea of how likely a certain type of property becomes empty, so you can apply this information to how you bid.

Lettings results for properties let through the Finding a Home scheme are published on our website, www.findingahometamworth.co.uk.

Empty properties within the last year (April 2009-March 2010)

Property type	Bedrooms	Area
